(54) GIFT CARD FOR GAME AND ITS MANUFACTURE

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a gift card for game, which is thin and easy in handling.

SOLUTION: A pinball gift card is provided with a card main body, a jewel grain 3 and a tack seal 4. The card main body is composed of a rear surface laminate film 13, a rear sheet 11, an intermediate sheet 7, a surface sheet 9 and a surface laminate sheet 12, which are superposed and bonded through fusion bonding. The receiving unit 15 of the jewel grain 3, having a thickness corresponding to that of 3 sheets, is composed of the opening 6 of the intermediate sheet 7, the opening 8 of the surface sheet 9 and the opening 10 of the rear sheet 11. On the other hand, a tack seal 4, which bears information such as the discriminating code of a card issuing shop and the like, is received in the opening 5 of the intermediate sheet 7.
